SpendWise: A Simple Backend Learning Project

Ideation Phase

Empathize & Discover

Data:	4 march 2026
Term ID:	SWTID-2026-2725
Project Name	SpendWise
Maximum Marks	4 Marks

Empathy Map Canvas:

a. User (Who are we empathizing with?)
   - College students, young professionals, and individuals who want to manage their daily expenses but find it difficult to track their spending.

b. What does the user SAY?
   - “I don’t know where my money goes every month.”
   - “I spend too much on small things like snacks and online shopping.”
   - “I want to save money but I don’t know how to track my expenses.”

c. What does the user THINK?
   - “If I track my expenses, I can manage my money better.”
   - “Maybe I should control my unnecessary spending.”

- “I need a simple tool to monitor my daily expenses.”

d. What does the user DO?
    - Spends money on food, travel, shopping, and entertainment.
    - Sometimes notes expenses mentally but forgets later.
    - Uses cash or digital payments without tracking spending.

e. What does the user FEEL?
    - Worried about running out of money before the end of the month.
    - Confused about where the money was spent.
    - Interested in saving money but unsure how to start.

f. PAINS (User Problems)
    - Difficulty remembering daily expenses.
    - Lack of a simple system to track spending.
    - Overspending without realizing it.

g. GAINS (User Needs / Benefits)
    - A simple way to record daily expenses.
    - Clear summary of monthly spending.
    - Better financial control and savings.
